

INSTALLATION TOOLING – LIVE LINE ACCESSORIES

BURNDY LIVE LINE ACCESSORIES

Type WTBGBW
 Self-firing tool body. Used for installing WEDGTAP connectors and Bails. Similar to Type WTB tool except utilizes a self-firing actuator for use with hot-sticks.

Type WHSCWH
 Hot-stick connector clamp used to hold outer body and inner wedge for installation on energised lines.

Type WHSPBC Patented
 Hot-stick dual clamp used to hold main and tap conductors in position during live line installations.

Type WHS90ADP
 Hot-stick angle adapter used to attach tool to universal hot-stick for live-line installation.

Type WHSWHADP
 Hot-stick angle wedge holder adapter attaches wedge clamp to universal hot-stick for live-line installation

Type WCHAWAS
 Hot-stick angle wedge holder adapter attaches wedge clamp to universal hot-stick for live-line installation.

INSTALLATION TOOLING – LIVE LINE ACCESSORIES

BURNDY LIVE LINE ACCESSORIES

Type WHSTA

Hot-stick tool (actuator) hammer attaches to the universal hot-stick for striking the tool actuator button to complete the installation.

Type WHSWB

Hot-stick wirebrush attaches to the universal hot-stick for cleaning the contact surface of the line conductor.

Type WHSGB

Hot-stick breech drive. Geared hot-stick adapter easily latches to the breech end of the installation tool without disassembly for use on energised lines.

Type WCHDCC

Hot-stick dual cable clamp used to hold main and tap conductors in position during live-line installation. Has small and medium tap range up to 20mm diameter.

Type WHHWB

Hand held wire brush for cleaning surface contact areas on non-energised conductors.
