

Bushing Boot

Application

Silicone Rubber Straight/right angled bushing boot (sealing sleeve)

- > To be used on screened polymeric or rubber insulated cables of 7.2 to 12 kv
- > Cold applied bushing boot is designed for use on either single or 3 core cables from 70 up to 300mm², upto a maximum system voltage of 12kV
- > The bushing boot can accommodate bushings with diameters between 30-70mm.

Features & Benefits

- > No need for specialised tools
- > No heating or filling required
- > Suitable for vertical or angled position
- > The circuit may be energised immediately after completion of the termination

MINIMUM CLEARANCE DIMENSION FOR TERMINALS SHROUDED WITH SILICONE RUBBER BOOTS
